Homology, Homotopy and Applications

Volume **5**(2), 2003

Homology, Homotopy and Applications (ISSN 1512 - 0139) is the all-electronic, refereed journal on homology and homotopy in algenra and their applications to the mathematical sciences. A printed version is published in partnership with "International Press", P.O. Box 43502, Somerville, MA 02143, USA, http://www.intlpress.com.

The influence of homology and homotopy is found in many fundamental domains of mathematics and the aim of "Homology, Homotopy and Applications" is to unify such applications, to show its merit, importance and diversity and to present in time to its reader new information about the progress of the area and the relationships with other fields.

To this end "Homology, Homotopy and Applications" will publish carefully refereed significant and original research papers and expository survey papers of high level in the area, as well as research papers having substantial applications of results and technique of homological and homotopical algebra, for example to general algebra, algebraic topology, algebraic homotopy, algebraic geometry, K-theory, category theory, computer science, Galois theory, functional analysis, algebraic number theory, differential geometry and topology.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged excellent are accepted for publication.

The method of distribution of the journal is via Internet tools (`WWW`, `FTP`, etc.)

The journal is archived electronically and in printed paper format.

Subscribers to the journal receive abstracts of accepted papers by electronic mail. Compiled TEX(.dvi), Postscript and .pdf files of the full articles are available by `WWW/FTP`.

The journal is free to individuals.

University Departments, Libraries, and other institutional subscribers are invited to consult with the Editor-in-Chief about subscription and archiving. For further information, contact the Editor-in-Chief, Hvedri Inassaridze, `hvedri@rmi.acnet.ge`.

Homology, Homotopy and Applications uses the TEX typesetting system to define its contents and the Internet to disseminate them. Authors are invited to submit articles to any member of the Editorial Board and the Editors-in-Chief in any standard flavour of TEX (i.e. plain, LATEX, AMS-(La) TEX.). Tex sources files may be submitted by email directly to only one member of the Editorial Board.

Accepted papers will be archived electronically in DVI, Postscript and PDF format by the journal.

Algebraic Topological Methods in Computer Science

Proceedings of a Workshop Held at Stanford University

July 30 – August 3, 2001

Edited by Gunnar Carlsson
