(a) Figure subone.

Figure subone

(b) Figure subtwo.

Figure subtwo

(c) Figure subthree.
Figure subthree

(d) Figure subfour.

Figure subfour

1 Seventh Test

This test checks to see if the subfig package reacts correctly to the known sort of problem class. We check that on the list-of-figures page the continued figure correctly labeled from (a) to (h) and that on the list-of-tables page, the table has the two subcaptions in addition to the main caption. If not, than the nasty class has zapped us.
(We also need to check the test7.log file to insure that the problem was identified by the subfig package and a warning was issued.)
