The indentfirst package*

David Carlisle carlisle@cs.man.ac.uk

1995/11/23

Abstract

Make the first line of all sections etc., be indented by the usual paragraph indentation. This should work with all the standard document classes.

\if@afterindent

LATEX uses the switch \if@afterindent to decide whether to indent after a section heading. We just need to make sure that this is always true.

- 1 (*package)
- 2 \let\@afterindentfalse\@afterindenttrue
- 3 \@afterindenttrue
- 4 (/package)
