invite you to the talk

## The Future of Documents and Documentation

given by

Hans Hagen

**Abstract:** There will be some major changes in the way we deal with documents and documentation in the next few years. High quality on line viewing will start to replace paper. Instead of ever changing word processor formats, open formal document encoding formats will take the lead.

Characteristics of electronic documents compared to their paper ancestors will be demonstrated and discussed: we should not ignore hundreds of years of typographic tradition.

Aspects of source encoding in XML, transformations in XSL, processing using TeX and document distribution in PDF will be discussed and shown on examples.

Talk will be given at Faculty of Informatics, Masaryk University, **Brno, Czech Republic, Botanická 68a**, on Tuesday **March 21th, 2000, 2:00 PM** in multimedia auditorium **D2**.

---

Those interested in attending tutorial given by Hans Hagen at the same place on Monday 20th 13–20 and Tuesday 21th 9–12, please, register with [secretary@cstug.cz](mailto:secretary@cstug.cz) to attend. During the tutorial, one gets an insight how electronic documents are designed and constructed using context, tool developed by speaker.

**Hans Hagen** is current  $\mathcal{N}\mathcal{T}\mathcal{S}$  project leader. He is a director of PRAGMA, Advanced Document Processing.
